

1982—2007

The Hong Kong Transition Project

Becoming China:

The public state of mind on Hong Kong's integration with the mainland

(April 2001)

A research report from a multi-national, multi-disciplinary, longitudinal research project of academics from Hong Kong University, Hong Kong Baptist University, Academia Sinica and East Asia University of Macau on Hong Kong's transition from British Royal Crown Colony to Special Administrative Region of the Peoples Republic of China and its people's transition from foreign subjects to citizens.

Conflict between the United States and China over surveillance flights serves to underline the flip side of Hong Kong's advantages as China's richest, most internationalized, most successful

1982–2007 **The Hong Kong Transition Project**

trading entity. The advantages are numerous and often adduced. Hong Kong is already a WTO member, has a well-regulated stock-market and enjoys a highly advanced communications infrastructure. Many travel frequently abroad. A fairly high percentage speak English and/or mandarin as well as the local Cantonese. Hong Kong has some of the world's richest people. Hong Kong's businesses pursue commerce regionwide as well as globally. Most international firms have offices here. Its airport tops the world league for air cargo and ranks well up on passengers. The port is number one or two for container shipments. Trade from this tiny, thousand square kilometer base powers an economy larger than most countries. With an export/import trade over 500 billion USD per year, and a GDP of more than 170 billion USD, it holds over 100 billion USD in foreign reserves. Hong Kong's just under seven million people generate wealth equivalent to about a fifth of the rest of China put together; it equals roughly what 270 million mainland Chinese (a population the size of the US) produce.

The disadvantages of Hong Kong's nature and location have become more apparent since the 1 April incident. The disputed surveillance flights, made all along the China coast, take place in airspace over seaborne trade routes vital to Hong Kong's prosperity, if not survival. Besides pecuniary interests which involve the mainland and the US being Hong Kong's number one and number two import/export markets, there are considerable personal and family interests involved in any US-China conflict. Nearly half of Hong Kong people have close relatives with right of abode overseas, the lion's share in Canada and the US. About two thirds have mainland relatives and 15% relatives in Taiwan. Ten percent have overseas right of abode themselves. Much of Hong Kong's tourism involves mainlanders, Taiwanese and Americans. The US community living here is the largest non-military concentration outside US borders. US investment in and through Hong Kong to the rest of China amounts to scores of billions of US dollars. US warships, which regularly traverse the South China Sea, make Hong Kong a frequent port of call.

The recent events made one thing clear to every Hong Konger and any business person with interests affected by the China-US dispute: conflict curtailing the heavily used sea or air routes into and out of Hong Kong would have a catastrophic economic effect. Any dispute causing a breakdown in trade relations between the US and China would have severe economic and personal consequences for Hong Kongers. While a scattering of local people demonstrated outside the US consulate, the vast majority of Hong Kongers, despite being Chinese citizens, displayed very little of the emotions evident in the rest of China. One would expect that Hong Kong's recent return to the motherland after more than 150 years of colonialism would have witnessed a burst of patriotism. That did not happen.

The latest survey covered in this briefing began on the evening of 28 March, four days before the incident began, and concluded on the 4th of April, four days after it started but before the release of the American crew on 12 April. The survey in early November took place just after the vote of thanks on the Policy Address. The bump upward of optimism from August's record lows, just before the 2000 Legco election, has dissipated. Levels of optimism about Hong Kong's future stayed fairly steady through much of the economic downturn after an initial fall in 1998, but levels have dropped significantly since mid-2000, despite economic rebound.

1982-2007 **The Hong Kong Transition Project**

Table 1 How do you feel about 1997 and Hong Kong's reunion with China? (Feb and June 1997) Looking back over the first year of reunion, how do you feel about HK's prospects for the future as part of China? (July 98)

How do you feel currently about HK's future prospects as a part of China? (April 1999 on)

	Feb 97	June 97	July 98	Apr 99	July 99	Nov 99	Apr 00	Aug 00	Nov 00	Apr 01
Very Optimistic	7	6	6	5	5	4	5	3	5	4

While men consistently appear more optimistic about Hong Kong's future as a part of China than women, pessimism prevails equally between the sexes. And while optimism fell among both genders, its dropped more from November among men (10 percentage points) than among women (8 percentage points).

Public opinion in April 2000 hit a post-handover low in satisfaction with the performance of the PRC government in ruling China following a good bit of sabre-rattling about the election of DPP presidential candidate Chen Shui-bian in Taiwan in March. The heightened tensions with the US in April 2001 seem to have played a role in driving down satisfaction rates again after recovery in August and November 2000. But other reasons, closer to home, played a more important part.

The reasons closer to home can be seen in the variations of the satisfaction rates of President Jiang. Dissatisfaction hit a peak in November, following the summoning of the Chief Secretary for Administration Anson Chan to Beijing for a very public dressing down (Chan’s performance ratings hit record heights in April 2001, see below), and the apparent deal-making over a second term for the mostly disliked Chief Executive Tung Chee-hwa. That Beijing and ultimately President Jiang may have approved Ms Chan’s resignation may have also affected Jiang’s ratings. Nevertheless, President Jiang has a far higher approval rating than Chief Executive Tung. These local political events seem a more likely source for the drop in satisfaction with President Jiang than events in the South China Sea, as the satisfaction ratings for China’s handling of Hong Kong affairs will show below.

Premier Zhu Rongji, on the other hand, has maintained his high ratings right along. His concentration on economic affairs such as WTO accession and in opening up China earn him ongoing accolades. Nevertheless, his more nationalistic-sounding comments of late, and perhaps his recently voiced support of a second term for Tung Chee-hwa, have cost him 5 percentage points in the satisfaction ratings since November (Jiang's did not drop since November).

1982-2007 The Hong Kong Transition Project

Proof that reasons for rising levels of dissatisfaction with President Jiang and the Chinese government lies closer to home rests in Table 9. Interference after August (Anson Chan's October chiding in Beijing, Jiang's November comments about Hong Kong journalists and rumours about deals for a second Tung term) sparked a 10 percentage point drop, below majority approval for the first time since the handover.

1982-2007 ✿ The Hong Kong Transition Project

The impact on Hong Konger's feelings about patriotism as expressed in attitudes toward China's National Day has been to see feelings of patriotism freeze at about the same level over the past three years after an initial rise. While those self-described as proud or excited in October 1998 stood at 15%, and rose to 24% in November 1999, it dropped back to 17% in November 2000 and fluctuated to 19% in April 2001 (samples of around 800 have a range of error of plus or minus 4 percentage points, thus more than four points change are needed to indicate a possible change in sentiments). There was no patriotic surge during the China-US confrontation.

Table 10 How does the celebration of 1st October National Day make you feel?

Uneasy/Unhappy	2	1	2	1	3	2	2
Refuse/DK	1	1	1	2	1	-	1

The lower level of satisfaction with the central government seems to stem less from its own performance toward Hong Kong, per se, than with its support for and association with the Tung administration. So far, the appointment of Donald Tsang and Antony Leung have not helped the Tung administration recover public support (see satisfaction with government performance below, and with their respective appointments, below). While satisfaction with the performance of the central government in handling Hong Kong affairs dropped four points, (at the edge of statistical significance) satisfaction with the Hong Kong government's relations with the central government fell 12 points over the same time. And, for the first time since the handover, a possible majority said they were dissatisfied with the Hong Kong government's handling of mainland relations.

The complexity of Hong Kong-Mainland relations

Relations between Hong Kong and the mainland are more than just local-central government relations, of course. And while just under 90% of Hong Kongers are ethnically Chinese, fully a third do not have relatives on the mainland and a fifth of Hong Kongers say they have not crossed into the Chinese mainland in the previous two years. On the other hand, about 10% indicate they have relatives who commute from Macau, Shenzhen or Guangdong to Hong Kong for school or work on a regular basis. Some 17-21% (Nov. 2000 and April 2001) have traveled to China more than 10 times in the past two years.

When it comes to various measures to increase Hong Kong-mainland connections, support and opposition varies widely. Perhaps the most sensitive, and controversial, concerns the daily quota of mainlanders allowed into Hong Kong for settlement purposes. Currently, this quota is set at

150, up from the 75 per day allowed until shortly before the handover, and increased then only to handle the buildup of children and spouses of Hong Kong residents who were forced to live outside Hong Kong because they lacked right of abode in the SAR. The Right of Abode controversy over the children of SAR residents led to the first, very controversial reversal by the National Peoples Congress Standing Committee of the Court of Final Appeal in June 1999.

In early October 2000, in a post-election survey of 721 people, we asked: “The SAR government currently accepts 150 mainland migrants into HK every day. How many per day do you think is acceptable and desirable?” The average response was 72, about half the current quota. The range varied from 0 to 2,000 per day.

Table 12 “The SAR government currently accepts 150 mainland migrants into HK every day. How many per day do you think is acceptable and desirable?” (Oct 2000) N=721

0	10 or less	15-40	50	70 or less	75	100	150	200	250 to 2000
33	5	2	14	1	3	15	22	2	1

In sum, the responses show: Support for a number under present quota: 73%
 Support for present quota: 22%
 Support for more than present quota: 3%

By about 3 to 1 Hong Kongers prefer the present quota reduced, with a third wanting it eliminated. This result in early October led to further questions in November 2000 in a Post-Policy Address survey conducted just after debate and voting on the traditional Legco motion of thanks for the address by the Chief Executive. We classified those who paid a great deal and fair amount of attention to the address and debates as high, some attention as medium, and little to none as low. This degree of attention to Mr. Tung’s address, which included a number of statements about cross-border relations, was cross-tabbed with satisfaction or dissatisfaction with the government’s performance in improving cross-border relations and travel.

Table 13 Attention paid to Policy Address by satisfaction with performance of government on improving cross-border travel & cooperation (Nov 00)

	High	Medium	Low	total
Very Satisfied	6	2	3	3
Satisfied	53	56	49	53
Neutral	11	16	12	14
Dissatisfied	19	17	16	17
Very Dissatisfied	7	2	6	4
Don’t Know	4	7	14	8
total	100	100	100	100

table contents: Percent of Column Total N=792
 Chi-square = 32.38 with 10 df p = 0.0003

While 59% of those who paid a high level of attention to the Policy Address expressed satisfaction with cross-border efforts of the government, only 52% of those paying little to none expressed satisfaction, and while 26% of the high attention givers were dissatisfied, 22% of the

low attention givers felt the same. This showed a polarization among all groups, but particularly among those paying closer attention. After the extended proposals made by Financial Secretary Donald Tsang in his final Budget Address in March concerning expanding cross-border ties, we developed a question which explored Hong Kong-mainland relations in much more detail than ever before. The overall responses are reported below, in order of degree of support. Most of the proposals have majority support, except the one proposal the government has put first on its priority list, that which would encourage mainland professionals to move to Hong Kong.

Table 14 Would you support or oppose the following steps to increase Hong Kong-mainland connections? (Apr 2001)

	Support	Neutral	Oppose	DK
Build hi-speed train to Guangzhou	76	13	6	4
Introduce smart card visa/permit inspection	76	9	10	4
Connect HK-Shenzhen MTR/Light rail lines	76	12	11	2
Provide legal assistance to HK residents on mainland	70	10	17	4
Provide HK education/healthcare to HK residents in some cities in Guangdong	59	14	24	4
Open border 24 hours	50	21	27	3
Provide scholarships to best mainland students & allow to stay in Hong Kong	50	17	28	4
Encourage mainland professionals to move to Hong Kong	34	18	45	4

And perhaps nothing better illustrates the complexity of relations across the mainland-Hong Kong border than the crosstab below between responses to the question whether respondents had a relative who regularly commuted for work or school across the border (11% in April 2001) and their support for 24 hour border opening. While not surprisingly, 60% of those with commuting relatives wanted the borders open 24 hours, versus only 47% of those with no relatives in China, 30% of those with commuting relatives opposed 24 hour borders, significantly above the 25% of those with no relatives in China. Perhaps a good portion of those with relatives just across the border don't want to risk being subjected to visits from their mainland relations day and night.

 Chi-square = 17.97 with 10 df p = 0.0556

The complexity of feelings and associations with the rest of China spills over into more personal self descriptions. Overall, there has been no real change in the level of those who describe themselves as simply Chinese since about 1996. This description has always been chosen by those who see themselves as more patriotic, and this descriptor is significantly correlated with a variety of measures of support for the central government and for the current Chief Executive. The choice of Hong Kong British, once chosen by about 10% of the survey sample, has now dropped to a consistent 3 to 4% of the respondents. Most of these are Chinese ethnics, not Caucasian expats from the UK. These number less than 20,000.

Table 16. The following is a list of how you might describe yourself. Which is the most appropriate description of you?

1982-2007 The Hong Kong Transition Project

But the apparent reality that only a distinct minority find association with China satisfying and stimulative of patriotism does not translate into stronger localism focused on the SAR government. About the same proportion, one in five, finds pride and excitement in the establishment of the SAR as in China's National Day.

Table 17. How does the celebration of 1st July SAR Establishment Day make you feel?

Hong Kong people, as dominantly either refugees themselves or the children of refugees, seem very instrumental in their attitudes toward life and government. While many people in other countries have in common the “what have you done for me lately” attitude toward government and parties, few have that attitude when it comes to their national loyalties and personal identities. But many Hong Kongers do seem to regard their affiliation with Hong Kong as optional, as something which could and should be changed if they become unsatisfied with life here. This provisional, temporary state of residency and local affiliation has been remarked on as part of the Hong Kong ethos during its colonial era. It shows little sign of change now, post-handover, even when Hong Kong's identity and national status have been fixed and its residents regarded as Chinese nationals, at least, officially if not always by themselves.

1982-2007 The Hong Kong Transition Project

Table 18. Would you leave or seek means to leave if changes are unsuitable to you after 1997? (Excludes those planning to leave.) Phrasing from Jan 1998: If HK is no longer suitable for you, would you seek means to leave HK?

The remarkable rise in yes responses in April 2000 above was directly related to the prospect of violence across the Taiwan straits after the election of DPP President Chen in March 2000. The China-US conflict over the surveillance flights did not seem to shake people's determination to stay in Hong Kong nearly as much as possible Taiwan conflict did. Nevertheless, a remarkably high proportion of Hong Kong people report themselves ready to leave if circumstances change in some unsuitable manner. Increasingly, those reasons appear economic in nature, not political as pre-1997. Given Hong Kong's continuing economic malaise, at least as felt by the people themselves, such readiness to depart cannot be reassuring.

There appears to be a connection between feelings of overall optimism or pessimism about Hong Kong's future as a part of China, feelings on China's National Day and the SAR's Founding Day, and satisfaction with life in Hong Kong. And so the importance of people's satisfaction with life here, and with various aspects of the government takes on added importance, above and beyond that assumed in other countries. Significantly, never has satisfaction with life in Hong Kong been lower than in April 2001. The decrease in the proportion of those willing to leave from April 2000 directly relates to a lessening of prospects of war over Taiwan, not to an increase in commitment to Hong Kong or greater satisfaction with life and government here.

Sources of dissatisfaction

Reasons for dissatisfaction with life in Hong Kong, as anywhere, are complex and multi-layered. As with anyplace, local government performance and leadership play some role in how people feel about where they live; in the case of Hong Kong, this plays perhaps a greater than normal

1982-2007 The Hong Kong Transition Project

role. The expectation promoted by the Hong Kong government is that satisfaction with its performance fell with the Asian economic crisis, and therefore it would rise as the economy recovers. There is, as yet, no support for this expectation, despite the economic rebound.

The bases for dissatisfaction with government vary widely, but in order to get some idea about which issues are having the greatest effect on the ongoing disgruntlement with the government,

we asked for levels of satisfaction or dissatisfaction on a matrix of 15 issues. The issues are ranked below from most dissatisfied to least dissatisfied. Those who answer neutral usually have no preference either way or feel unaffected by the issue. Those answering don't know usually give this answer when unfamiliar with the issue. While three issues return clear majorities of dissatisfied, not a single issue of the fifteen mentioned returns a majority of satisfied.

Table 22 How satisfied or dissatisfied are you with the performance of the government on the following issues?

	Very satisfied	Satisfied	Neutral	Dissatisfied	Very dissatisfied	DK
Reducing unemployment	2	10	16	43	30	4

1982-2007 The Hong Kong Transition Project

The early resignation of Anson Chan as Chief Secretary for Administration and the appointment of Donald Tsang as her replacement, and of Antony Leung as Mr. Tsang's replacement as Financial Secretary rendered the following patterns of satisfaction and dissatisfaction.

Table 25 Were you satisfied or dissatisfied with:

	Very dissatisfied	Dissatisfied	Neutral	Satisfied	Very Satisfied	DK
Early resignation of Anson Chan	7	25	37	19	2	9
Donald Tsang apt. as CS Admin	1	6	30	50	5	8
Antony Leung apt. as Fin Sec	2	15	33	25	2	23

While Donald Tsang's appointment garnered majority approval, it failed to help the overall levels of dissatisfaction with Tung Chee-hwa, which continues with a majority disapproving of his performance. Anson Chan's and Tsang's disapproval ratings dropped significantly.

Table 26 Dissatisfaction with performance of top 4 HKSAR leaders

	Jan 98	Apr 98	June 98	Oct 98	Apr 99	July 99	Nov 99	Apr 00	Aug 00	Nov 00	Apr 01
Tung	29	36	47	42	42	46	53	54	56	56	57
Chan		8	19	16	11	14	23	18	16	15	6
Tsang		16	38	23	12	14	18	16	11	12	8
Leung		41	40	29	58	53	59	49	56	62	59

And in terms of satisfaction with performance, both Tung Chee-hwa and Secretary for Justice Elsie Leung hit an all time low, while both Anson Chan and Donald Tsang hit all time highs. The conclusion must be drawn that dissatisfaction with the government stems from, and focuses

1982-2007 The Hong Kong Transition Project

on, the Chief Executive and the one person to date appointed to government from outside the civil service. The jury remains out on Antony Leung's contribution toward strengthening or weakening the administration.

Table 27 Satisfaction with performance of top 4 HKSAR leaders

	Jan 98	Apr 98	June 98	Oct 98	Apr 99	July 99	Nov 99	Apr 00	Aug 00	Nov 00	Apr 01
Tung	60	53	46	46	50	46	39	38	32	35	31
Chan		77	71	70	81	74	67	61	73	76	85
Tsang		71	54	64	80	72	70	65	78	79	83
Leung		31	39	35	24	28	25	28	28	23	22

Bottom line, the problems with leadership in the government have resulted in strong support for making the Chief Executive directly elected. Those opposing direct elections are largely older males and those born in China.

Table 28 Do you support or oppose direct election of the Chief Executive?

	Strongly support	Support	Neutral	Oppose	Strongly oppose	DK
April 2000	34	41	5	11	2	7
Aug 00**	28	43	5	17	2	5
Nov 00	36	39	7	10	3	4
April 01	28	41	10	12	3	5

**All registered voters surveyed in the August survey

And support for Tung Chee-hwa's bid for a second term remains weak, ranging between 18-24% over the past year. Not surprisingly, support rose shortly after the Policy Address in October (24%), but dropped back to 21% in April 2001.

Table 29 Would you want to see Tung Chee-hwa running for a second term in 2002?

	Apr 00	Aug 00	Nov 00	April 01
Definitely not want	20	21	22	20
Would not	32	29	23	27
Neutral/DK	28	32	31	32
Would Want	16	15	19	19
Definitely would want	2	3	5	2

In order to gauge whether people had clear ideas about who they might prefer over Mr. Tung, we asked a follow up question in April, with the following results ranked by preference.

Table 30 Who would you prefer to stand for election in 2002 for Chief Executive?

Choice	% All	HK born	China/other born
Don't Know	42	43	41
Tung Chee-hwa	22	17	29
Anson Chan	20	23	16
Donald Tsang	6	7	4
Other	4	4	4
Leung Chun-ying	1	--	1
Rita Fan	1	1	-
Peter Woo	1	1	1
Martin Lee	1	1	1
Christine Loh	1	1	2
Allen Lee Peng-fei	1	1	1

Despite Ms Chan's adamant insistence that she would not run for Chief Executive, and despite four years of being Chief Executive, statistically the two top officials come out in a dead heat. Those born in Hong Kong clearly prefer Ms Chan, those in China, Mr. Tung. Tung's support is mainly among those 60 and up. The clear winner, however, is Don't Know. And perhaps the contrast between the strong support for direct elections and the weak preferences shown above points up as little else the source of the disaffection with life in Hong Kong and with the government of Hong Kong.

Worry and other states of mind

Concern for Hong Kong's economic future rose dramatically with the Asian economic crisis, and despite double-digit growth in 2000 and continued growth in 2001, worry for Hong Kong's economic future continues at a high level.

1982-2007 The Hong Kong Transition Project

The level of worry in April 2001 approaches that registered in April to June 1998, with a marked deterioration since November 2000. Neither Chinese New Year nor the budget delivered in March apparently gave many much hope for improvement.

There is usually a gap between worry about Hong Kong's economic prospects and worry about personal standards of living. The gap continues to the present. However, the level of concern about personal standard of living is about what it was in the depths of the Asian economic crisis in 1998.

The level of those worried about their employment situation has, if anything, gotten a bit worse than in 1998-1999, the worst of the recession. The distribution of concerns about jobs concentrates among those in their 40s, 50s and 60s, as Table 34 shows.

Table 33 Are you worried or not worried about your employment situation

Those in their 40s and 50s are also usually the age group which faces some of the heaviest economic burdens, with aged parents on the one hand and children in secondary school or seeking post-secondary education on the other. Many of these people also had much less access to education than today's younger people, and as a consequence are less well prepared to adjust to the economic disruptions ahead as Hong Kong adjusts its economy to the new post-handover, post-WTO China entry era.

1982-2007 ✿ The Hong Kong Transition Project

The bottom line in terms of family finances over the next year also shows deterioration from expectations in November. At that point, 74% expected improvement or to stay the same. In April 2001, 68% had the same expectations, and those anticipating deterioration rose from 21% in November to 26% in April 2001. This is not as bad as the 38% who expected worse times ahead in October 1998, but it marks the first reversal of expected improvement since then.

Table 35. How do you expect your family financial situation to change over the next 12 months?

	Oct 98	Apr 99	July 99	Nov 99	Apr 00	Aug 00	Nov 00	Apr 01
Improve a lot	1	--	-	--	1	1	--	--
Improve somewhat	7	8	10	9	13	12	11	8

Deteriorate a lot	7	8	6	4	5	6	6	7
DK	7	4	7	5	5	6	4	5

The vast majority are worried, and nearly one in four very worried, about Hong Kong's competitiveness. Despite Donald Tsang's comments about improving Hong Kong's competitiveness, or perhaps because of them, concern has risen steeply, from 40% fairly/very worried in November to 49% fairly/very worried in April.

Table 36 How worried are you about: competitiveness of Hong Kong?

In all the bad news about people's feelings which the results of this survey reflect, the one clear area of post-handover success has been the great lessening of worry people had pre-handover about threats to their personal freedoms. Despite the Falun Gong controversy and various comments by President Jiang about press freedoms in Hong Kong, and despite concerns about the rule of law (see below), the conviction remains that most personal freedoms continue unthreatened. However, as will be seen below, this general feeling that personal freedoms are secure is NOT reflected in certain specific freedoms such as freedom of press and speech.

When asked to rank their worry among six aspects, the economic aspect took number one, as its has since January 1998. This aspect is also up considerably from a year ago though its dominance is less than it was during the depths of the economic recession in mid-1998.

1982-2007 The Hong Kong Transition Project

Apr 01	10	3	8	48	11	7		12

In order to get a better assessment of concerns about various types of freedoms we introduced a new matrix question in April 2001.

Table 41 Are you currently worried or not worried about:

	Not Worried	slightly worried	fairly worried	Very Worried	DK
Free press	50	25	13	7	5
Free speech	56	22	11	7	4
Free assembly	49	25	13	6	8
Religious freedom	61	18	8	6	7

The response patterns vary considerably from that given for worry about personal freedoms, showing that these issues are not always understood as related to personal freedoms. And there are important variations of concern within each aspect, as Table 42 on worry about religious freedom by religious affiliation shows. Protestants are much more likely to show concern about religious freedom than other groups, though about an equal portion of Buddhists and Protestants describe themselves as very worried about religious freedom. The Buddhist group seems to be a direct response to recent crackdowns on Falun Gong and other Buddhist sects.

Table 42 Religion by worry about religious freedom

	None	Catholic	Protestant	Buddhist	Taoist	Ancestor worship	Other	total
% of total sample	50	5	10	9	1	23	1	
Not worried	63	56	49	61	78	63	57	61
Slightly worried	18	13	28	16	0	16	29	18
Somewhat worried	8	16	9	5	0	6	14	8
Very worried	5	7	12	14	22*	4	0	6
DK	7	9	2	4	0	10	0	7
total	100	100	100	100	100	100	100	100

table contents: Percent of Column Total N= 830 *sample too small for reliable assessment
Chi-square = 44.05 with 24 df p = 0.0075

Due to the Falun Gong controversy, we asked questions directly about the group, first about whether this is an issue to which people have paid much attention.

Table 43 How much attention have you paid to the Falun Gong controversy?

	A great deal	Some	Little	None	DK
April 2001	6	25	50	16	4

Most have paid little or no attention to the controversy, despite a great deal of press and governmental discussion. We then asked:

Table 44 What steps, if any, should the Hong Kong government take toward Falun Gong?

No need to take steps	34
Observe and collect info on activities	35
Warn members only	3
Restrict public activities	8
Arrest/Jail members	--
DK/refuse to answer	15

1982-2007  **The Hong Kong Transition Project**

Very few even wanted to restrict Falun Gong members' public activities and almost none would go so far as to arrest or jail members. Most saw no need to take steps or only supported collecting information on activities.

Concern about rule of law, which rose in August 2000, continued at the same level.

Table 45 Are you worried or not worried about rule of law in Hong Kong

	Not Worried	slightly worried	fairly worried	Very Worried	Don't know
July 1999	55	23	13	5	4
April 2000	56	21	12	7	5
Aug 2000	39	27	18	12	4
Nov 2000	39	23	18	16	4
Apr 2001	37	26	17	13	7

Consistently with other responses, worry about social unrest, which had risen sharply during the election campaigning, then eased strongly in November 2000, rose again as concerns about the economy grew.

Table 46 Are you worried/not worried about social unrest in Hong Kong?

	Not Worried	slightly worried	fairly worried	Very Worried	Don't know
Oct 1998	21	27	30	19	3
April 1999	29	32	23	13	2
July 1999	35	29	22	10	3
Nov 1999	25	31	29	12	3
Apr 2000	41	29	19	11	1
Aug 2000	31	31	21	15	1
Nov 2000	41	28	17	14	1
Apr 2001	35	29	19	13	3

Continuing very high, but easing somewhat, are worries about over-population.

Table 47 Are you worried or not worried about excessive population

	Not Worried	slightly worried	fairly worried	Very Worried	Don't know
July 99	18	19	28	33	1
Nov 99	19	18	31	30	1
April 00	23	21	28	27	1
Aug 00	20	19	27	33	2
Nov 00	19	18	23	38	2
Apr 01	24	21	24	29	3

And concerns about pollution also continue very high, with 69% either fairly or very worried, though the highest level dropped from 52% very worried in November to 39% very worried in April. This is the one issue which consistently shows the highest degree of concern, and the least amount of satisfaction.

Table 48 Are you worried or not worried about air and water pollution

	Not Worried	slightly worried	fairly worried	Very Worried	Don't know
July 1999	6	18	34	35	4
Nov 1999	8	18	36	38	1
April 2000	5	14	31	48	1
Aug 2000	7	17	31	44	1
Nov 2000	7	16	25	52	1
Apr 2001	8	20	30	39	3

Overall, open ended worries continued to show that economic related issues dominate personal concerns.

Table 49 Which problem of Hong Kong are you most concerned about now personally?

	Jan 98	Apr 98	Oct 98	Nov 99	Apr 00	Aug 00	Nov 00	Apr 01
Economic growth rate	38	32	20	10	13	16	22	12
Affordable housing	8	4	2	2	1	1	1	2
Unemployment	11	27	47	48	31	40	32	40
Salary cuts, welfare cuts			5	4	6	6	4	4
Property, stock markets			4	2	3	3	2	3
Int'l competitiveness			2	3	3	2	2	2
Other econ.			4					1
Economic Issues total	57	63	84	69	57	68	63	64
Education	4	3	4	8	6	9	10	7
Elderly	5	5	3	2	3	2	2	4
Crime	6	5	2	4	6	4	2	3
Medical	2	1	1	1	2	-	2	2
Pollution/overpopulation	1	1	1	5	10	4	2	4
Social Issues total	18	15	11	20	27	19	18	20
Corruption	1	1	-	1	1	-	--	1
Political stability	5	4	2	2	4	5	4	2
Freedom of press	2	2	+	1	2	1	1	1
Freedom to demonstrate	2	1	+	1	1	+	1	1
Autonomy of HK	2	1	+	2	2	+		1
Fair judges/freedom to travel	3	3	+	3	1	2	1	--
Competence of Tung & civil servants	-	-	-	1	1	1	1	--
(all with + above)			2+			1+		
Political Issues total	15	12	4	11	12	10	8	6

Bottom line, unemployment and salary cuts which worried 46% in August dropped to 36% in November, but rose to 44% in April. As the poet said, perhaps April is the cruellest month.

Measures of political mindsets and participation

One of the distinguishing characteristics of Hong Kong's system from that on the mainland is the existence of an incipient pluralistic party system. Tables 50 and 51 below show levels of knowledge about and satisfaction with the 10 parties which currently are active in Hong Kong political life. The furthest right column indicates the proportion which did NOT answer don't know (in other words, all those who had an opinion about a party. That means that the best known party, the Democratic Party, sparked an opinion among 75% of the respondents, while the New Century Forum was unknown by 81% of respondents. The don't knows were dropped and then those satisfied and unsatisfied were recalculated so that every party's results sum to 100%, though the portion of respondents differs considerably. The difference between those satisfied and dissatisfied, with dissatisfied majorities indicated with a negative sign (-), appear in the central columns. Table 50 compares results with November 1999 and April 2000. Table 51 between April 2000 and April 2001.

Table 50. Satisfaction/Dissatisfaction with parties and leaders (Apr 2000)

	Dissatisfied	Satisfied	Difference +/- April 2000	Difference +/- NOV 1999	% who know about party
Democratic Party led by Martin Lee	57	43	-14	+4	75
DAB led by Tsang Yok-sing	51	49	-2	-6	66
LP led by James Tien	56	44	-12	-20	59
Frontier led by Emily Lau	44	56	+12	+30	66
CTU led by Lau Chin-shek	30	70	+40	+42	64
FTU led by Cheng Yiu Tong	39	61	+22	+24	54
HKPA led by Ambrose Lau	65	35	-30	-34	35
Citizens Party led by Christine Loh	31	69	+38	+44	56
HKADPL led by Fredrick Fung	27	73	+46	+42	52
New Century Forum led by Ng Ching-fai	62	38	-24	Not asked	19

Table 51. Satisfaction/Dissatisfaction with parties and leaders (Apr 2001)

	Dissatisfied	Satisfied	Difference +/- April 2001	Difference +/- April 2000	% who know about party
Democratic Party led by Martin Lee	59	41	-18	-14	71
DAB led by Tsang Yok-sing	50	50	0	-2	66
LP led by James Tien	57	43	-14	-12	58
Frontier led by Emily Lau	47	53	+6	+12	63
CTU led by Lau Chin-shek	28	72	+44	+40	63
FTU led by Cheng Yiu Tong	34	66	+32	+22	52
HKPA led by Ambrose Lau	62	38	-24	-30	36
Citizens Party led by Alex Chan	45	57	+12	+38	35
HKADPL led by Fredrick Fung	21	79	+58	+46	47
New Century Forum led by Ng Ching-fai	53	47	-6	-24	23

Table 51 indicates that the Democratic Party still suffers from the strongly negative image which saw a stunning plummet in its vote proportion in the September 2000 Legco elections. Meanwhile, the DAB has continued that slow growth in support which now leaves it with the largest positive gap between its support and that of the Democrats yet recorded. Frontier has also dropped considerably, to +6 in April 2001 from +30 in November 1999. The ADPL has risen considerably over the same time, showing that a strong political focus on economic and

social as well as local neighborhood issues meet the approval of many people. The New Century Forum has seen a rise in its profile and approval, though it still polls more negative than positive.

Table 52 shows the results of questions on what types of political dispute respondents find acceptable or not acceptable. Elections tend to raise levels of acceptance of the first five aspects listed, but to little affect the bottom four. The June 1998 results followed the May Legco elections by about two weeks while the April 2000 survey preceded the September 2000 elections by about five months. The April 2001 survey came about seven months since the September 2000 Legco elections and well before any upcoming elections in 2003. Familiarity breeds acceptance while lack of an election lessens support for pluralistic practices. Pluralism depends on building a proper political structure, and while Hong Kong has support for such structures and practices, their current incomplete state leaves them weakened.

Table 52 Acceptability of political disputes

	Acceptable June 1998	Acceptable Apr 2000	Acceptable Apr 2001
Multiparty competition in elections	85	78	73
Party debates in Legco	83	77	73
Disagreements between Exco & Legco	76	75	73
Arguments btwn party leaders on tv/radio	73	72	67
Street demonstrations & protests	72	67	63
Exco veto of Legco proposals	50	51	47
Lawmaker's use of harsh words in debate	50	52	49
Business group veto of grassroot proposals	34	39	40
Protests in Legco by non-Legco protestors	25	26	24

Participation in civil society organizations continues strong, as Table 53 shows.

Table 53 Have you attended any meetings or activities of one of the following groups in the last six months? (Percentage reporting membership/attendance/doesn't add to 100)

	1/98	4/98	7/98	10/98	7/99	11/99	4/00	8/00	11/00	4/01
Trade Union	6	5	8	5	5	6	8	5	6	4
Professional association	8	6	5	5	6	6	10	6	6	5
Kaifong	7	5	5	8	6	5	5	5	5	5
Mutual Aid Committee	15	13	11	10	8	8	9	9	6	7
Clan Association	3	2	3	3	2	2	2	3	2	2
Political/pressure group	1	1	2	1	1	1	2	1	2	2
Charitable Association	17	12	15	16	13	16	18	18	16	11
Recreational & cultural group	6	4	4	5	4	7	6	7	7	5
Religious group or church	20	18	18	20	15	16	21	17	19	17
Owner's corporation				12	11	12	14	12	14	13
Environmental group				5	3	4	5	5	5	4

And participation in terms of representative and participative structures, as listed below, continues strong, though the lack of electioneering shows up in the lower rates of activity for signature campaigns and opinion surveys. Nearly as many people contact Legco members for assistance as contact Government departments in November 2000 and April 2001. Donations to political parties remain strong.

Table 54 Did you express concern or seek help from any of the following groups in the past 12 months? (% Yes responses only)

Donate to pol. party	11	14	16	18	16	20	16	15	17	17	14	12	15

Hong Kongers, despite repeated descriptions as being politically apathetic, give the lie to such descriptions by the amount of time they spend watching or listening to news and current affairs programs, with fully a fourth qualifying as "news junkies" by spending more than 10 hours a week on such past times. An informed citizenry is basic to a healthy civil society.

Table 55. How often do you listen to or watch any news and current affairs programs on radio and TV?

	April 98	July 98	Oct 98	April 99	July 99	Nov 99	Apr 00	Aug 00	Apr 01
Never	4	2	4	2	5	4	1	3	4
< 1 hr per week	5	7	7	6	9	11	8	8	8
1-3 hrs per week	23	21	24	28	25	25	29	31	26
4-6 hrs per week	20	24	24	24	21	20	23	20	20
7-10 hrs per week	17	18	17	17	17	18	18	17	18
> 10 hrs per week	31	29	24	23	23	22	20	21	24

And fully 9 out of 10 Hong Kongers read a newspaper on a regular basis. In fact, as Table 59 shows, many people read more than one newspaper a day on a regular basis. Newspaper readership is one more measure of the level of political information citizens act upon.

Table 56. How often do you read a newspaper?

	Oct 98	Apr 99	July 99	Nov 99	Apr 00	Aug 00	Apr 01
Daily	64	68	61	64	65	66	61
Several times a week	24	25	24	28	28	26	29
Never	11	5	12	8	7	7	10
Don't know	1	2	2	4	1	1	--

Comparatively, the grinding economic pressures have lessened people's reading of various sections of the newspaper as often as they did a year ago, perhaps due to increases in the workweek.

Table 57 How often do you read some or all of the following parts of the newspaper? (April 2000)

	Daily	Frequently	Sometimes	Seldom	Never
International affairs	40	19	24	12	4
China politics & news	29	16	27	20	9
Local politics & news	43	28	19	7	2
Op-ed pages	21	14	32	20	13
Business & market news	22	14	27	20	17

Table 58 How often do you read some or all of the following parts of the newspaper? (April 2001)

	Daily	Frequently	Sometimes	Seldom	Never
International affairs	32	18	22	13	5
China politics & news	24	15	27	16	7
Local politics & news	36	24	19	8	3
Op-ed pages	18	10	28	19	14
Business & market news	18	10	23	20	18

Table 59 shows the distribution of newspapers read by respondents. The left wing press altogether barely reaches 1% of Hong Kongers. English readership ranges between 5 and 6%. Oriental Daily and Apple Daily dominate 86% of readers, though 54% read, or also read, other papers in addition to these two.

Discrimination and equality

One of the fundamental differences between politics based on Marxist-derived notions and those based on Western liberalism rests in definitions of equality and the concept of rights. Marxist-oriented states tend to define equality in terms of outcomes, usually economic outcomes. The concept of need or allocation of goods and services according to need ranks far higher than the adversarial notions of rights which dominate liberalism. This is the fundamental divide between the “two systems” of Hong Kong and the mainland. In Hong Kong, most people believe the state can and should be limited to mediating between disputants and to respecting and upholding rights of individuals. The terms of private engagements are stipulated in law with an eye to protecting, or allowing means to protect, human rights. These concepts of civil society and civil rights are increasingly fundamental to global interactions. As part of the WTO agreements, such processes of citizen and corporate interaction and restrictions on state power form the most difficult aspect of accession China faces.

They also pose problems to Hong Kong, for as a colonial entity the rights of individuals often were restricted by the colonial power for control purposes. And in the case of racial discrimination, first security considerations led to Europeans controlling the top offices; then the necessary process of localization led to Europeans being ousted from those positions, sometimes “unfairly”. Today, however, post-colonial and post-localization, Hong Kong faces pressures to conform to international liberal norms on a variety of human rights, especially those rights which affect minorities of various kinds. This is a fundamental aspect of citizenship development, and as such the HKTP introduced a new matrix to measure types of discrimination in Hong Kong. We asked, as indicated below (in order asked).

Table 60 Have you/your family personally experienced or not experienced discrimination on account of:

	Always experience	Frequently experience	Occasionally experience	Never experience	DK
Age	2	1	14	81	2
Gender	1	-	6	91	2
Race	1	1	6	91	1
Province/national birthplace	1	-	8	90	1
Sexual orientation	-	-	2	94	4*
Class/educational level	1	2	17	78	2
Political orientation	-	-	3	92	6*
Language/accent/dialect	1	-	10	86	2
Disability	-	1	4	94	2
Religion	-	-	1	97	2

The asterisked (*) don't knows above which are much higher than 1-2% don't know average are more than likely indicators of the sensitive nature of the question and of reluctance to answer frankly. While Hong Kong has laws against gender discrimination, it does not against age and racial discrimination, areas which show equal or much greater need for legislation in terms of frequency of experience. And while discrimination against religious belief currently seems low,

1982-2007 The Hong Kong Transition Project

the concerns shown by some groups such as Protestants and Buddhists over religious freedom may indicate that this area may show a rise in future surveys. Since racial discrimination is one type of discrimination which always affects a minority but which in its pernicious effects infects a whole community, and since Hong Kong is so dependent on international trade and tourism, the lack of laws forbidding race discrimination seems anomalous, and self-defeating.

Hong Konger's overall state of mind? They seem confused about their place as part of the mainland but participants in the increasingly globalized wider world. The lack of consistent, legitimated, recognized leadership with a clear mandate and which practices interactive policy-making compounds the sense of drift and crisis. The Chief Executive election of 2002 may well prove decisive for Hong Kong's future, locking it into the slow decline so many predict and perceive, or renewing its sense of dynamism and outward drive.

Project Summary

This longitudinal, multimethod project begun in February 1989 analyzes the nature and direction of political development over the period 1984-1997 and beyond the sovereignty change to 2007. Two elections in 2007-08, for Chief Executive and for the Legislative Council, will be the first conducted under rules laid down by Hong Kong people themselves. Thus 2007 marks the transition of Hong Kong people from colonial subjects to full citizens.

Aspects of political-economic development are examined through the identification and interview of politically active elites, social groups, and interest groups; in-depth social sector and random surveys; participant observation, and photo-validated visual observation of election campaigning. Project members currently are from Hong Kong Baptist University, Hong Kong University, and Academia Sinica. Members are nationals from Hong Kong, Canada, US, and Taiwan, with past members also from Australia, Germany and the People's Republic of China.

Project Significance

The significance lies in its longitudinal and in-depth documentation and analysis of the nature and direction of politics in a highly developed, highly educated and traditionally internationally-oriented capitalist Hong Kong which is within a unique situation of integration into a far less developed, less educationally endowed, and traditionally xenophobic socialist China, itself undergoing rapid, uneven modernization. Such a unique context of clashing political cultures in itself justifies close study, but of greater significance to the people of China and Hong Kong is the disproportionate impact that the economic and political behavior the 7 million people of Hong Kong are having on the modernization processes and international standing of their recent sovereign, the People's Republic of China. A detailed, documented, and longitudinal interdisciplinary study of political development in Hong Kong provides an invaluable database for understanding not only local political development but also the model which inspires, or challenges, that of key groups in the PRC.

CURRENT MEMBERS: Michael E. DeGolyer, Director (HKBU)

1982-2007 The Hong Kong Transition Project

Briefing written by: Michael E. DeGolyer

Survey analysis: Lo Shiu-hing, Hu Ko-wei, M. E. DeGolyer, Newman Lam, Janet Scott, Kenneth Chan.

Survey preparation: M.E. DeGolyer, Sonny S. H. Lo, Alfred K. W. Hu, Kenneth Chan, Janet Lee Scott, Newman Lam, Eilo Yu

Survey administrator: Cheung Pui-ki

The latest survey was carried out by telephone interviews using the Hong Kong Baptist University CATI (Computer Aided Telephone Interviewing) lab. Details of the sampling methods may be found on the project website. The results of a survey of April's sample size, 830, can be assumed with 95% confidence to be subject to a sampling error of not more than plus or minus 3.7 % (rounded off to +/-4). The registered and non registered voter sample of 1487 is plus or minus 2.9. (usually only 1059 likely registrants used, with a plus or minus 3 rate). The June 1997 rate was +/-3%, July 1996 error rate is +/- 3.2% and the December 1996 rate is 5%. Following World Association of Public Opinion Research guidelines, all survey results are rounded off to the nearest whole number to avoid the impression of overprecision. Other surveys by the Hong Kong Transition project in this series used the same methods, with varying contact and completion rates.
